

Make Web Wise Kids' Programs Part Of Your Community Shield Approach

and use interactive computer games, not a lecture, to reach today's youth with the message of safety

WWK's programs for middle-school, high-school students and parents have proven extremely effective in changing children's online behaviors. They address issues such as:

	<p style="text-align: center;">ONLINE LURING... PREDATORS... CHAT ROOMS...</p> <p><i>Missing</i> tells the story of Zack, a kid in Vancouver who forms an online friendship with Fantasma. This guy is so cool – he has an online magazine about beach life in California, and he sends Zack great stuff, like graphic arts and software; little does Zack know that he is a predator. After they disappear into San Diego together, players work with a detective to rescue Zack and arrest Fantasma.</p>
	<p style="text-align: center;">CYBERSTALKING... MODELING SCAMS... SPYWARE...</p> <p><i>Mirror Image</i> tells the story of teenagers Sheena and Megan, best friends who end up being victimized by a criminal; the lures of modeling and of online romance hook them both. Neither of the girls realizes that hacking software has been placed on their computers during their conversations with their “online boyfriends.” Players work with a detective to track the predator and arrest him.</p>
	<p style="text-align: center;">PIRACY... BULLYING... ILLEGAL DOWNLOADING...</p> <p><i>Air Dogs</i> was designed to show teenagers that online crimes have lifelong legal and social consequences for teens and their families. In the game, Luke is a teenager who shows great promise as a snowboarder. He needs money for gear and training, so he begins to counterfeit software in his basement. Players collect data and evidence to catch Luke's boss. The message of Air Dogs is clear: theft and extortion are crimes, whether you're 16 or 60.</p>
	<p style="text-align: center;">SAFETY TIPS...WEB SITE DANGER ZONES...SOLUTIONS</p> <p><i>Wired With Wisdom</i> has been uniquely designed to provide parents, teachers, law enforcement officers & youth leaders with useful <u>information and solutions</u> related to the problems that today's e-generation faces. The program is comprehensive without being complex, and the format is attractive and easy to navigate so that even the least Internet-savvy adult can enjoy learning. The subject matter is broken down into five segments:</p> <ul style="list-style-type: none"> ● Overall tips for Internet Safety ● E-mail Safety Tips ● Safety Tips for Social Networking ● World Wide Web Safety Considerations ● Cell Phone Safety
