

LiveWires Issue resolution (Acrobat 8)

Version 1.01

How do I deal with the following error messages?

1. Dialog box stating Adobe Acrobat or Adobe Acrobat Reader 6, 7, or 8 are not installed when using Air Dogs or Mirror Image.

Issue: Error stating that Adobe Acrobat 6 or 7 is not installed when running Mirror Image or air Dogs.

Synopsis: at the time of release of Air Dogs and Mirror Image, Adobe Acrobat 8 was not released to manufacture. Now, most systems are operating on Adobe Acrobat 9.

Solution: You will require Administrator privileges for the following override. A command line parameter may be set for either air dogs or Mirror Image to override the Acrobat checking. For air Dogs and Mirror Image, create shortcuts with the following command lines:

Drive/path/AirDogs.exe /noacrocheck

Drive/path/MirrorImage.exe /noacrocheck

When implementing as a shortcut, it is important to note that the command-line parameter must reside outside the right sided double quotation:

“drive/path/Airdogs.exe” /noacrocheck

“drive/path/MirrorImage.exe” /noacrocheck

Note: there must be a space between the exe or exe” before you enter the /noacrocheck. Also, if this fails some systems require a –noacrocheck instead of the forward slash.

If you are unable to get your games downloaded, please call us at Web Wise Kids to have someone on our team help walk you through this process. **714-435-2885**
